PRIME SERVICES

ABOUT PRIME SERVICES

Prime Services is a Bengaluru-based proprietorship established on 01 July 2017, providing asset, scrap and site-related solutions for corporate, commercial and industrial needs.

Core services include non-hazardous scrap purchasing, e-waste solutions, corporate asset liquidation, and demolition & dismantling. We support engagements ranging from individual material and asset collections to office clearances, surplus asset liquidation and larger site-based dismantling and clearance projects.

Each enquiry is evaluated according to material or asset type, quantity, location, site conditions, project scope and feasibility. Our approach focuses on clear communication, coordinated execution and responsible handling.

BUSINESS ENVIRONMENTS WE SUPPORT

Corporate Offices · Commercial Establishments · Industrial Facilities · Office Relocation & Closure · Refurbishment & Clearance Projects

PRIME SERVICES

OUR CORE SERVICES

Prime Services supports corporate, commercial and industrial clients through four core service families. From individual scrap or surplus-asset enquiries to multi-category clearances and site-based projects, engagements are evaluated according to scope, location and execution needs.

01 - SCRAP PURCHASING — NON-HAZARDOUS

Purchase and collection of non-hazardous scrap and recoverable materials generated by offices, commercial establishments and industrial operations.

02 · E-WASTE SOLUTIONS

Collection support for obsolete and surplus business IT/electronic assets, including computers, laptops, servers, networking equipment, monitors, UPS systems and related equipment. Where regulated downstream processing is required, materials are directed through appropriate downstream channels.

03 · CORPORATE ASSET LIQUIDATION

Structured support for organisations managing surplus office, commercial and business assets arising from relocation, refurbishment, consolidation, upgrades, closure or other operational changes.

04 · DEMOLITION & DISMANTLING

Site-assessed dismantling, equipment and fixture removal, material segregation and clearance support for commercial and industrial projects. Project scope is evaluated according to site conditions, access, materials involved and execution needs.

PRIME SERVICES

04 — Scrap Purchasing — Non-Hazardous

Commercial & Industrial Scrap Purchasing

Prime Services purchases non-hazardous scrap and recoverable materials from corporate offices, commercial establishments and industrial operations.
Whether a specific material category or larger multi-material clearance, scope is evaluated based on material type, approximate quantity, condition, location, site access and commercial feasibility.

01 — Office & Commercial Scrap

Scrap and recoverable materials from office relocation, refurbishment, renovation, consolidation and clearance, including furniture, workstations, storage units, fixtures and related materials.

02 — Metal & Industrial Scrap

Ferrous and non-ferrous metal scrap, industrial surplus and other recoverable materials generated through commercial and industrial activities.

03 — Machinery, Equipment & Electrical Items

Machinery, equipment, electrical items and associated recoverable materials arising from upgrades, replacement relocation, shutdown or clearance.

04 — Corporate & Bulk Enquiries

Coordinated purchasing and collection for larger scopes involving multiple material and asset categories, subject to quantity, location, site conditions and feasibility.

HOW WE ASSESS AN ENQUIRY

Material or Asset Details • Approximate Quantity • Site Location • Photographs Where Available • Access or Clearance Information

Site assessment may be arranged where needed before commercial and execution arrangements are confirmed.

purchase@primeblr.com • www.primeblr.com

PRIME SERVICES

05 — E-Waste Solutions & Corporate Asset Liquidation

Prime Services supports organisations managing obsolete electronics, surplus IT equipment and other business assets arising from technology upgrades, relocation, refurbishment, consolidation, closure and changing business needs.

Our approach is determined by asset type, quantity, condition, location, site circumstances and applicable handling needs.

E-WASTE SOLUTIONS

Computers & Business IT Assets
Desktops • Laptops • Monitors • Related Business Computing Equipment

Servers & Networking Equipment
Servers • Networking Hardware • Associated IT Infrastructure Equipment

Electronic & Electrical Equipment
Business Electronics • UPS Systems • Components • Other Electronic or Electrical Assets

Responsible Downstream Handling
Where materials require regulated downstream processing, appropriate downstream channels are used according to the nature of the material and applicable requirements.

CORPORATE ASSET LIQUIDATION

Office Relocation, Consolidation & Closure

Furniture & Fixtures
Workstations • Office Furniture • Storage Units • Shelving • Fixtures • Other Commercial Assets

Machinery & Equipment

Multi-Category Asset Clearance
Combinations of IT assets, furniture, fixtures, equipment, machinery, scrap and other surplus business assets.

ONE REQUIREMENT. MULTIPLE ASSET CATEGORIES.

Where corporate clearance involves multiple asset types, Prime Services can assess them as a coordinated scope rather than treating each applicable category as a separate enquiry.

purchase@primeblr.com • www.primeblr.com

PRIME SERVICES

06 — DEMOLITION, DISMANTLING & SITE CLEARANCE

Site-Assessed Solutions for Commercial & Industrial Projects

Prime Services supports commercial and industrial projects involving dismantling, equipment and fixture removal, material segregation, recovery of appropriate materials and site clearance.

Because every site and project differs, the proposed scope is assessed according to site conditions, access, materials involved and execution needs before work is confirmed.

01 Dismantling

Planned dismantling of structures, installations, fixtures and other project elements within confirmed scope and site conditions.

02 Equipment & Fixture Removal

Coordinated removal of machinery, equipment, commercial fixtures and associated materials from relocation, replacement, refurbishment, shutdown or clearance.

03 Material Segregation & Recovery

Identification and segregation of materials generated during dismantling and clearance, supporting recovery where commercially and operationally appropriate.

04 Site Clearance

Coordinated clearance of materials arising from the confirmed project scope, planned around site access and agreed execution arrangements.

FROM SITE ASSESSMENT TO CLEARANCE

A site visit may be arranged to understand project scope, access conditions, materials and execution considerations before commercial and scheduling arrangements are confirmed.

PRIME SERVICES

08 — HOW WE WORK

A Clear, Coordinated Process

Every engagement is different. Prime Services follows a structured process to understand material, asset or project scope, assess feasibility and coordinate agreed work through execution.

01 Share Your Requirement

Contact by phone, WhatsApp, email or website. Share the type of material, assets or project, approximate quantity, site location and photographs where available.

02 Initial Review

We review the information to understand the enquiry, location and approximate scope. Additional information may be requested.

03 Assessment / Site Visit

Where appropriate, a site assessment is arranged to review materials or assets, quantity, access conditions, site circumstances and proposed scope.

04 Scope & Commercial Confirmation

Based on the assessment, applicable scope, commercial terms and execution arrangements are discussed and confirmed before scheduling.

05 Scheduling & Coordination

The collection or project date is coordinated based on the confirmed scope. Site access, timing and relevant arrangements are aligned before execution.

06 Execution & Clearance

The confirmed collection, asset clearance, dismantling or other agreed work is carried out according to the established scope and site requirements.

PRIME SERVICES

09 — RESPONSIBLE HANDLING & BUSINESS INFORMATION

Responsible Business Approach

01 Assessment Before Execution

Materials, assets and project scopes are reviewed by type, quantity, condition, location, site circumstances and proposed work.

02 Recovery & Reuse Where Appropriate

Materials and assets may be identified for recovery, reuse or other commercially and operationally appropriate routes.

03 Regulated Downstream Requirements

Where materials require regulated downstream processing, appropriate downstream channels are used according to the nature of the material and applicable requirements.

04 Scope-Based Execution

Collections, clearances and projects are coordinated according to the confirmed commercial and execution scope.

05 Udyam / MSME — Registered Micro Enterprise

06 GST — Registered Business

07 Government e-Marketplace (GeM) — Registered Seller / Service Provider

COMPLIANCE TRANSPARENCY

Business registrations and marketplace registration should not be interpreted as recycling, pollution-control or environmental authorizations. Where an engagement involves regulated materials or activities, applicable handling and downstream requirements are considered according to the nature and scope. Prime Services does not represent third-party downstream authorizations or certifications as its own credentials.

PRIME SERVICES

10 — WHY PRIME SERVICES

Practical Solutions for Business Needs

Prime Services supports corporate, commercial and industrial clients through responsive communication, multi-category capability, site-based assessment and coordinated execution.

01 Multi-Category Capability

Scrap, IT/electronic assets, corporate assets, machinery, equipment, dismantling and site-clearance scopes can be assessed together where applicable.

02 Requirement-Based Assessment

Each enquiry is considered according to material, asset or project type, quantity, location, site conditions and feasibility.

03 Corporate & Bulk Capability

From individual material or asset categories to larger multi-category corporate and commercial clearances.

04 Clear & Coordinated Process

From initial review and assessment through commercial confirmation, scheduling and execution according to agreed scope.

Bengaluru-Based Operations
Operates from Bengaluru and supports Bengaluru and surrounding areas.

PAN-India Support Through Partner Network
Projects elsewhere in India may be supported depending on location, project scope, material volume and feasibility.
